Experience

CodeFacts IT Solutions

Software Engineer

May 2022 – June 2024

Hyderabad, Telangana

Projects

Service Radar & Blood Radar

May 2022 – July 2022

- * Service Radar is a mobile application that connects users with local service providers across various categories.
- * The Blood Radar feature allows users to communicate with nearby blood donors.
- * The application serves as a marketplace for services, enabling users to find and hire professionals for various needs.
- * Implemented client-side mobile apps using React Native, JavaScript, and REST APIs. Developed the Web Application Portal using React JS, Bootstrap, and CSS.

Go Arena

August 2022 – February 2023

- * Go Arena is an online platform for booking sports grounds and facilities, offering services for sports grounds where users can book through a player app.
- * The Partner app helps ground owners manage daily bookings and necessary services. The Admin dashboard allows admins to upload sports equipment, manage ground onboardings, and oversee service partners.
- * Implemented client-side mobile apps using React Native and JavaScript. Developed the Admin Dashboard using React JS and JavaScript, HTML, and CSS.

Anvaya Conventions

February 2023 – April 2023

- * Anvaya Conventions is a wedding venue for which we implemented an admin web application with features such as venue booking, vendor management, important date blocking, menu changing options, employee management, bill generation, and monitoring daily inquiries using React JS.
- * Developed a mobile application using React Native for employees to manage daily inquiries, receive real-time updates, register attendees, and schedule events.

Drive 9

April 2023 – June 2023

- * Drive 9 improves fuel efficiency for various vehicles through the use of mileage boosters. The company created an agent network, allowing the app to monitor listed agents' sales, stocks, and orders for their products.
- * Implemented client-side mobile apps using React Native, JavaScript, and REST APIs. Developed the Admin Portal using React JS and Bootstrap.

Guntur Raja Pickles

June 2023 – October 2023

- * Guntur Raja Pickles is an online platform offering a variety of veg and non-veg pickles, spices, and veg powders for the international market. Integrated Razorpay for secure payments.
- * Implemented client-side mobile apps using React Native, JavaScript, and REST APIs. Developed the Admin Portal using React JS and Tailwind CSS, including bulk import functionality and inventory management.

DietNest

August 2023- January 2024

- * DietNest is a destination for dietetics and healthy organic food in India. They combine the expertise of dietitians with a range of natural and organic products. Additionally, we've implemented Razorpay for secure and reliable payment processing.
- * Implemented Web Applications using React Js, Redux Tool Kit, JavaScript, and REST APIs. Developed the Mobile Application using React Native and Redux Tool Kit.

Go Chauffeur

November 2023 – June 2024

- * Go Chauffeur offers on-demand professional driver services tailored to your schedule, including one-way, round-trip, and outstation options.
- * Client-side mobile apps, developed using React Native and Redux Toolkit, integrate JavaScript, REST APIs, Tailwind CSS, and Google Maps for seamless navigation and real-time updates. We've also implemented Razorpay for secure payment processing, ensuring a smooth and reliable transaction experience.
- * For administrative purposes, our web application built with React.js provides robust tools for managing trips, drivers, payments, commissions, and overall trip logistics.

Go Booze

December 2023 - June 2024

- * Go, Booze is an Australian online liquor delivery service currently undergoing a website transition from Shopify to React and Tailwind CSS. Concurrently, we're developing client-side mobile apps using React Native, Redux Toolkit, JavaScript, and REST APIs.
- * Our technology stack extends to include a User Web application and an Admin Portal built with React, JavaScript, Bootstrap, and Tailwind CSS, ensuring a seamless user experience and efficient management capabilities.
